## Professional Summary:

Cloud & DevOps Engineer with hands-on experience in AWS, Linux administration, CI/CD automation, Docker containerization, and Infrastructure as Code using Terraform. Skilled in building secure, scalable cloud environments, automating deployments, and implementing DevOps best practices to improve reliability and efficiency.

## Technical Skills:

- **Amazon Web Services:** Ec2, EBS, IAM, S3, VPC, RDS, VPC Peering,
- **DevOps:** Git, Jenkins, Ansible, Docker, Terraform
- **Operating system:** Linux (Ubuntu, CentOS, Amazon Linux), Windows.

## Professional Experience:

### 1 Developer – DevOps & Linux Project Work:

NIC (National Informatics Centre)

Aug 2025 – Present

- Implemented CI/CD pipelines in **GitLab** to automate build, test, and deployment processes.
- Created and managed **AWS EC2 instances** for application hosting and testing environments.
- Configured **VPC (Virtual Private Cloud)**, subnets, and security groups for network isolation and secure connectivity.
- Managed **IAM users, groups, and policies** to ensure controlled access to AWS resources.
- Built and deployed applications using **Docker containers**.
- Performed **Linux command-line administration** — user management, permissions, services, and package installations.

### 2 Deployment Engineer:

Precision Informatics (M) Pvt. Ltd

Aug 2023 – Oct 2024

- Deploy applications on **Linux servers**.
- Deploy and manage applications on Linux servers (**Red Hat, Ubuntu**) with integrated MySQL and MSSQL databases, ensuring smooth operation across environments. Strong Command of Linux
- Deployed web servers such as **Apache and Nginx**, and monitored their performance regularly.
- Database and set up **Biometric Authentication** for Remote Access Tools (RDP, SSH), managed user accounts, permissions, and file Systems on Linux Servers to ensure secure and efficient operation

## Projects:

### Starbucks Clone DevOps Project

- Containerized the Starbucks clone application using **Docker** to ensure consistent and portable deployments.

- Deployed the application on **AWS EC2**, configuring secure access, networking, and optimized server performance.
- Built a complete **Jenkins CI/CD pipeline** to automate code build, testing, scanning, and deployment.
- integrated **SonarQube** in Jenkins to perform static code analysis and maintain code quality standards.
- Used **Trivy** to scan Docker images for vulnerabilities and ensure secure container deployments.
- Automated AWS infrastructure setup using **Terraform**, including EC2 provisioning and security group configuration.
- built and pushed Docker images to **Docker Hub** using Jenkins with secure credential management.
- Managed all automation stages using a well-structured **Jenkins file** for end-to-end CI/CD workflow.

### Training/Course:

**AWS & DevOps**

**Soft Logic Academy**

**Mar 2025 – Aug 2025**

### Education:

- Bachelor of Electrical and Electronics Engineering.
- PSV College of Engineering and Technology, Krishnagiri, CGPA: 8.2 %
- Anna University

### Declaration:

**I hereby declare that all the information given above is true and correct to the best of my knowledge.**
